

Point of Care 4 day Ultrasound Workshop

Monday the 2nd to Thursday the 5th of March 2020

Accredited by ASUM, ACEM, ACCRM and CICM, this course provides the theoretical backbone for learning point of care ultrasound through our compulsory pre reading. The 4 day workshop is dedicated to as much hands-on ultrasound experience as possible. We dedicate a full day to ECHO training, but also cover AAA, EFAST, DVT, early pregnancy, renal, lung, vascular access and FIB during the other 3 days. The course is directed by physicians. Tutors are an even mix of physicians and sonographers. Sonographers bring all their scanning expertise while accredited physicians bring with them the understanding of how ultrasound is used in clinical scenarios.

What sets us apart

Registration:

Full 4 day only:

Residents /registrars \$2750 (incl GST)

Staff Specialists/VMO's : \$3850(incl GST)

Registration to: [Sue Roncal](#)
